

Question1

```
nova@nova-VirtualBox:~$ cat linux.md
# What is Linux?
Linux is an operating system.
# 3 Reasons to use Linux:
* High stability
* Linux is stable and secure
* Availability of tons of software applications
nova@nova-VirtualBox:~$
```

Question2

```
nova@nova-VirtualBox:~$ cat linux+other.md
# What is Linux?
Linux is an operating system.
# 3 Reasons to use Linux:
* High stability
* Linux is stable and secure
* Availability of tons of software applications

# Other operating systems
* **Microsoft Windows** is a group of several proprietary graphical operating system families, all of which are developed and marketed by Microsoft.
* **macOS** is a series of proprietary graphical operating systems developed and marketed by Apple Inc.
* **FreeBSD** is a free and open-source Unix-like operating system descended from the Berkeley Software Distribution (BSD), which was based on Research Unix.
* **RISC OS** is a computer operating system originally designed by Acorn Computers Ltd in Cambridge, England.
